# FASTKEY™
KEY AND LOCK MANAGEMENT MADE EASY

I magine being able to manage, track, and locate locks and keys (or access cards) within your facilities easily through an intuitive interface. FASTKEY software allows hospitals to track keys and assign to specific employees with assigned due dates. It also provides alerts when keys become overdue.

With FASTKEY it is easy to know who has access to specific areas, rooms, or even spaces within a room. High risk areas are easily managed providing visibility of those with access and a history of details of all who have had access.

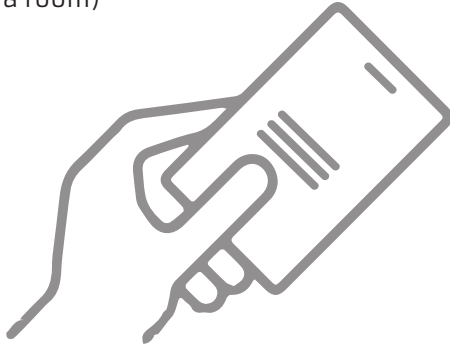

An intuitive dashboard provides critical information at a glance that is clickable to drilldown for additional detail.

FASTKEY is a SaaS solution, so all future product updates and enhancements automatically become available to all users. Single Sign On (SSO) including using Active Directory Federation Services (ADFS), enables FASTKEY to be used seamlessly alongside existing applications.
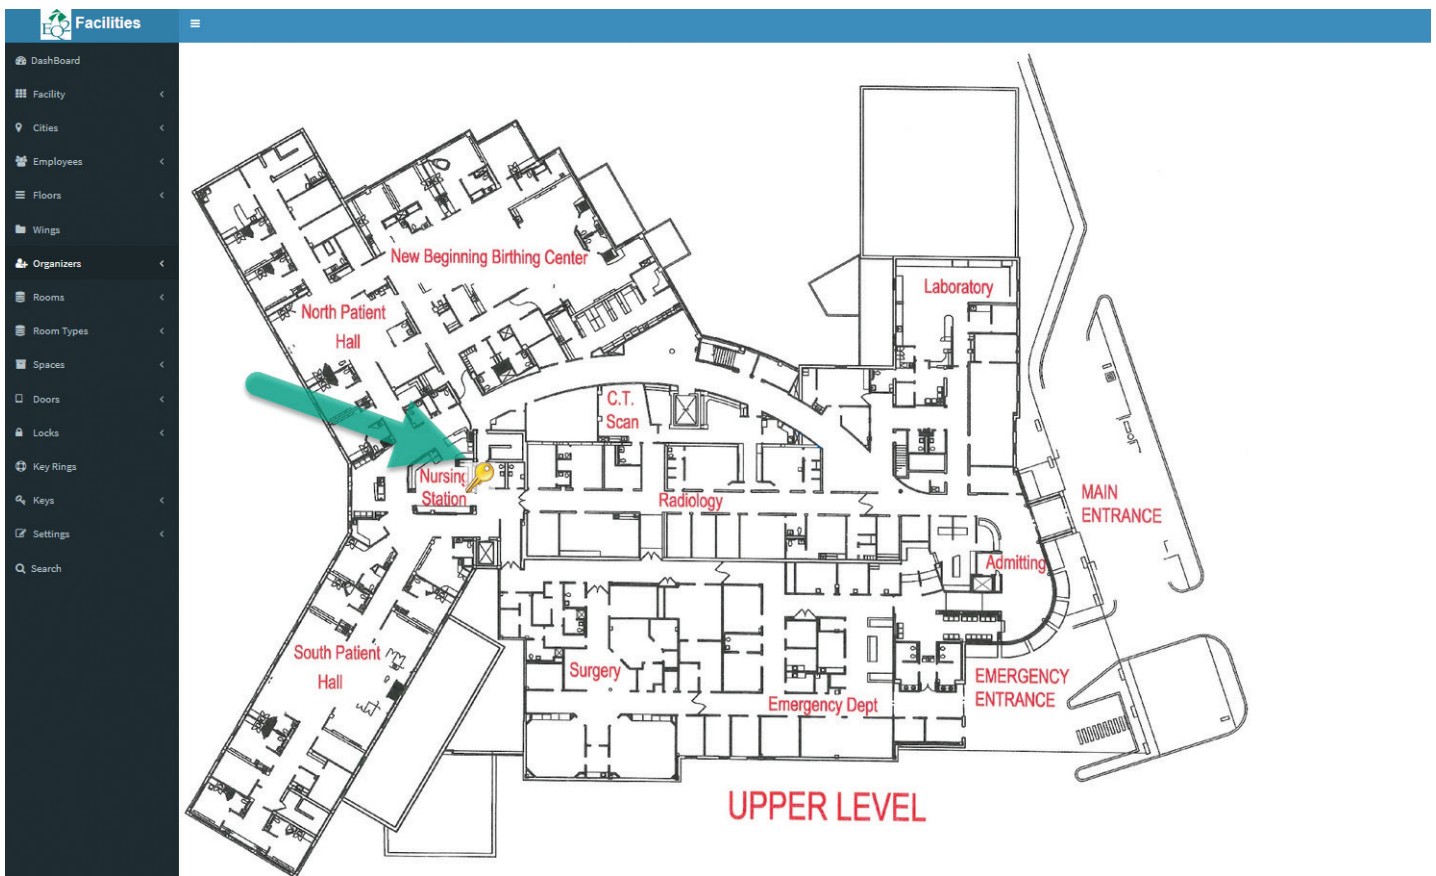

SECTIONS WITHIN THE PROGRAM WITH DETAILED INFORMATION ON EACH ITEM LISTED THERE:

- Employees – for both direct employees and contractors
- Facilities – all locations within an enterprise
- Floors – including floor map
- Wings
- Rooms – can be designated by different types
- Spaces (within a room)
- Doors
- Locks
- Key Rings
- Keys

SEVERAL DETAILS ARE STORED ON EACH KEY (OR ACCESS CARD), SUCH AS:

- Past Due
- Lost
- Due Within Next 2 Days
- Code
- Risk Level
- Key Type
- Lock Code
- Lock Type
- Door #
- Room #
- Key Ring
- Facility
- Location Code
- Assigned To
- Is it for a Medicine Cabinet?
- History
- Action
- View and change the location of a key on the floor map

A floor plan shows exactly where on the floor the key provides access.
